

**recomLine Yersinia IgG 2.0**  
**recomLine Yersinia IgA [IgM] 2.0**

**NEW**

Strip-Immunoassay with recombinant antigens for the detection of IgG, IgM, and IgA antibodies to *Yersinia enterocolitica* and *Yersinia pseudotuberculosis*.

*Yersinia enterocolitica* has become increasingly important as an intestinal bacterium that is pathogenic for humans. This organism is transmitted orally through contaminated water or food. Typical symptoms of an acute *Yersinia* infection are diarrhea, stomach ache, and fever.

*recomLine Yersinia* assays use recombinant *Yersinia* outer membrane proteins (YOPs) and adhesins of only *Yersinia* strains that are pathogenic for humans.

**Product #4672 recomLine Yersinia IgG 2.0**  
**(20 tests per kit)**

**Product #4673 recomLine Yersinia IgA [IgM] 2.0**  
**(20 tests per kit)**
