NEW PRESS RELEASE - LAUNCH OF CHIMERIC ANTI-MOUSE PD1 & PD-L1 RECOMBINANT ANTIBODIES

ST. LOUIS, April 17, 2023 –Leinco Technologies (“Leinco”) (St. Louis, MO), a biotechnology company and specialty manufacturer of antibodies, recombinant proteins, ELISA kits, and second step reagents today announced the launch of the mAbMods™ chimeric anti-mouse PD1 and PD-L1 recombinant antibodies to target mouse programmed cell death receptor 1 (PD-1) and programmed cell death 1 ligand 1 (PD-L1) in in vivo functional studies. These antibodies are the first in a line of mouse anti-mouse antibodies to be launched in the coming months. They are designed to mitigate the immunogenicity problems associated with the use of antibodies from other species such as rat or hamster in experiments using mouse models, particularly during prolonged use.

NEW WHITEPAPER | MEETING THE NEED FOR HIGH-PURITY RESEARCH-GRADE BIOSIMILARS

SCAN TO DOWNLOAD

The ability to speed up the development of biosimilars to meet an increasing need for biotherapeutics relies on building a solid foundation in discovery research. This in turn relies on the availability of high-quality research-grade biosimilars to support the cost-effective generation of reliable data. To meet this need, Leinco Technologies provides a range of research-grade biosimilars, including mutant forms to avoid unwanted effector functions. These antibodies are produced by recombinant technology and have the same specificities as the approved biologics, with a high purity backed up by extensive QC.

MEETING RECAP AND UPCOMING

Leinco made a big splash at AACR 2023 this year with a newer, bigger, and brighter booth design. Keep your eye open for our new booth at upcoming events. Leinco will be attending the following shows and conferences in 2023. Scan the code to schedule a meeting with one of our sales team members at an upcoming show now!

- *AAI - May 11 - 15*
- *SITC - Nov. 1 - 5*
- *AIC - Nov. 17 - 20*
