UPCOMING WEBINAR | HUMAN ANTIBODIES FOR EMERGING VIRUS INFECTIONS

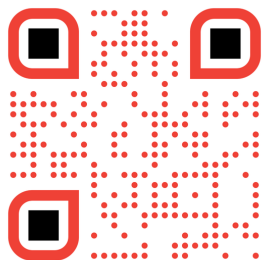

February 14th, 2023 • 12:30 p.m. PT, 2:30 p.m. CT, 3:30 p.m. ET

In this webinar, James E. Crowe, Jr., M.D., Director of the Vanderbilt University Vaccine Center, will talk about the proactive AHEAD100 initiative as well as how antibody discovery can now be conducted with extraordinary speed and precision, yielding molecules that can be used in diverse applications, including prevention, therapy, diagnosis, and vaccine characterization.

NEW CASE STUDY | EVALUATION OF MONKEYPOX ANTIBODY CLONES

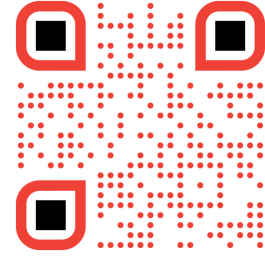

SCAN TO DOWNLOAD

In this study, three antibody clones available from Leinco Technologies were tested for their ability to bind and visualize mpox virus in cell cultures. The work was performed in the lab of Dr. John Connor, which focuses on understanding how the virus-host interaction works and methods to tip the balance in favor of the host. To do this they aim to determine how viruses hijack infected cells, and how cells defend themselves against viral infection.
