

## THE LEINCO LATEST

Welcome to the latest edition of the Leinco Latest! We are excited to bring you the newest updates and innovations from our dedicated team. In this issue, you'll find insights into our latest product developments and custom services that we offer. At Leinco Technologies, we are committed to advancing scientific discovery and providing you with high-quality, reliable products. Thank you for being a valued member of our community. Together, we are driving progress in the world of biotechnology.

---

### CUSTOM ANTIBODY SERVICES

At Leinco Technologies, we offer comprehensive custom antibody services designed to meet diverse research needs. Specializing in antibody production and development, we deliver high-quality solutions from initial antigen design to final antibody validation for both monoclonal and polyclonal antibodies. Our stringent quality control measures ensure exceptional products that cater to the unique requirements of diagnostics companies, large and small. With expertise in every aspect of antibody development and manufacturing—from stable cell line generation to antibody conjugation and engineering—we provide researchers with tailored solutions for their projects.

## NEW BIOSIMILAR CLONES AVAILABLE NOW

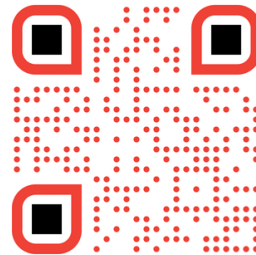

The growing demand for biotherapeutics hinges on a strong foundation in discovery, translational research, and pre-clinical studies. High-quality, cost effective, research-grade biosimilars are essential for generating reliable data. To support this need, Leinco Technologies offers a wide range of research-grade biosimilars, including Fc-muted forms to prevent unwanted effector functions. Explore our newly launched Biosimilar antibodies today!
